Comment Text :

12 --> As a concerned citizen and resident of the United States, I oppose the proposed Yucca Mountain Repository for nuclear radiation wastes. The site is unsuitable for long-term storage of such radioactive wastes, which will remain lethal for over 100,000 years. There is steepage of water at the site and it is subject to earthquakes. It cannot safely contain these radioactive wastes from endangering people, plants, and animals now and in the future. The United States has no moral or legal right to use and poison this land of the Western Shoshone nation, according to treaties signed by the Western Shoshone and the United States.

In addition, transport of nuclear radioactive wastes from current sites to the Yucca Mountain site will engager millions of people because of a likely accident along the routes to Yucca Mountain, no matter whether the wastes are transported by truck on highways or by trains on railroads.

The Yucca Mountain nuclear waste dump should not be approved. ]

Roy C. Treadway
